SAFETY EXPECTATIONS

The safety regulations under the Occupational Health and Safety Act (OHSA) apply to all employees, students, administrative staff, professors, researchers, contractors, technicians, technologists, post-doctoral fellows, and visitors at Queen's. Everyone in the workplace has legal duties and rights regarding OHSA.

Safety includes: good laboratory practice; good housekeeping; environmental safety; and ensuring that equipment, buildings, and surroundings are free from hazards.

Everyone is legally required and responsible for working safely, and bringing safety problems and concerns to the attention of their supervisor or the Department Safety Officer. We must all work together to ensure the Department of Chemical Engineering is a safe place to work and study.

In addition to working safely themselves, supervisors are responsible for ensuring that individuals who report to them have a safe work environment, follow the safety rules, and have available, and use proper equipment to ensure that work is performed in a manner so as not to create any hazards.

The Department Head has the responsibility and the authority for health and safety in the department and must provide safety standards, procedures, training, and audits to ensure compliance with OHSA.

I, _____________________________
Student/Worker SIGNATURE

have read, understand, and will comply with the above safety expectations, and the Department of Chemical Engineering Safety Standards Manual at https://chemeng.queensu.ca/safetymanual/index.html. I understand that non-compliance could lead to withdrawal of privileges in the department.
