

## Announcements - Winter 2021

---

### Course Registration & Timetable Conflicts

Students must be registered in the course, and receive a course orientation and safety briefing, before the end of the 1<sup>st</sup> week of classes.

Students must be available for the full 4-hour time period on their lab-work days and for any oral presentations. Timetable conflicts with CHEE 315 timeslots are generally not permitted.

Course timetable conflicts will only be accommodated when a student and the instructor of the conflicting course can provide the Laboratory Coordinator (D. Poirier) with assurance that the student will attend all CHEE 315 lab work and presentations during the term. Unfortunately, if this guarantee cannot be given, the timetable conflict will not be approved.

Further information and procedures for registering in courses with timetable conflicts is provided in the registration guide on the Faculty of Engineering and Applied Science website:
