

onQ

Winter 2021

The course onQ website will serve as the main source of course information and will be used for submission of all document-based deliverables and for receiving feedback and grades from Project Supervisors.

Select “*Content*” from the Navbar to navigate to a page that provides access to nearly all course information.

The left-hand sidebar menu on the “*Content*” page provides access to various categories of course information, as well as a list of work tasks with submission links for uploading deliverables.

Note:

- The course onQ website will be opened to students by Jan. 1 and will be closed on May 1.
- If you are not able to access the course onQ website by Jan. 2, it most likely means that you are not currently registered in the course. You should register in the course ASAP, if eligible. Register on-line or, if unable to register on-line, see the Undergraduate Program Assistant (Liann Joannette) for the proper forms (academic change form or prerequisite waiver).
